

## RAJA AMPAT SOUTH - 9D/8N

### Day 1 - Sorong to Waisai

Day 1 starts with your pickup from either your hotel or the airport. If we are picking you up from your hotel, it is generally around 07:30 – 08:00, if you are arriving on the day of departure, it is important that your arrival time is before 07:30. We will then head directly to the Ferry Port, where you will be met by a member of staff who will accompany you to Waisai. The ferry crossing is around two hours. Upon your arrival in Waisai, it is only a short walk to transfer to La Galigo. Once onboard you will be met by the Cruise Director and a welcome drink.

After you have been shown to your rooms and unpacked your luggage, it's time for a welcome briefing before we have some lunch, then you have some time to relax and soak up the amazing surroundings en route to our first dive of the day. Our 'welcome dive' is usually conducted at the nearby island of Saonek Kecil. The waters are generally calm, and is a perfect spot to get the diving going. After the sun sets over the eastern Indonesian sky, we will go looking for unusual critters in Saonek Besar, where you might also make your very first encounter with the iconic Tasselled Wobbegong Shark.

### Day 2 - Dampier Strait

Whilst in the central Dampier Strait we will conduct 4 dives. The top dive sites in this area are Blue Magic, home to majestic Oceanic Manta Rays, and other large pelagics such as Spanish Mackerel and Bigeye Trevally. Cape Kri, arguably the top house reef in the world, was made famous by Raja Ampat pioneer Max Ammer, and is next on the itinerary. Sawandarek Jetty, further down the southern coast of Kri island, is where you will probably feel like you're in an aquarium - only the fish are incredibly numerous, wild and free. And just to top off this (fish) action packed day, we will take you for a night dive on Kri's south coast, in Yenbuba Village's Jetty after you soak in the stunning sunset views with the islands of Waigeo and Gam in the distant, fiery horizon.

### Day 3 - Pianemo (a.k.a. Penemu)

The iconic limestone pinnacles have become synonymous with the Raja Ampat experience, and Pianemo lagoon/lookout is just one of many such stunning formations. The best time to hike this hill is early morning, before temperatures rise, the rewards for climbing are well worth it. Melissa's Garden is undoubtedly the top dive in this area, with a staggering number of coral and fish species packed into this small piece of marine real estate. Its beauty needs to be seen to be believed. We will then head to a lesser-known corner of Raja Ampat, an area known as Dayang, at the western end of Batanta island. The dive in Dayang takes place over a shallow, sandy reef which is actually a magnet for Manta Rays, which come to this area to feed as well as conduct routine visits to

their “cleaning stations” or “manta spa” (ask our Cruise Director to tell you about this fascinating aspect of their behaviour). As you relax and later enjoy a great night’s sleep, we will set sail for the southern islands of Raja Ampat...

#### Day 4 - Goa Farondi - Misool

We begin the diving in Misool at No Contest, a ridge that is home to an abundance of marine life, soft corals and overhangs. The second dive can be done at many sites located in the vicinity, including Pet Rock, Plateau, and Love Potion. For the third dive we will visit a popular site named Goa Farondi, where there is a chance to do some swim-throughs and meet the Bumphead parrotfish population. Misool is a huge island, with an overwhelming multitude of smaller, satellite island clusters. There are in fact numerous “regions” within this area itself. If being surrounded by limestone pinnacles does not instil in you a sense of awe, doing a night dive amongst these towering peaks surely will!

#### Day 5 - Wayil - Misool

Next up we will show you the dive sites around Wayil, where you will undoubtedly experience the feeling of being far, far away from the rest of civilization ... An outstanding selection of dive sites are located fairly close to each other in Wayil, and we will start with the blockbuster - Four Kings, a group of towering pinnacles which are almost too large to circumnavigate in a single dive, which also happens to attract giant Oceanic Manta Rays. Giant Trevally, Napoleon Wrasse, and large Snapper are all often found here. The oddly shaped Wedding Cake is up next (you will see why it’s called as such), which is home to some of Misool’s Pygmy Seahorse community. Finally we will dive into Barracuda Rock, a pinnacle with an unusual underwater cavern, which is also home to a patrolling tribe of schooling Barracuda. In the afternoon we will visit the famous “Love Lagoon”, a calm, isolated body of water which has been incredibly shaped by the hands of Mother Nature into the form of a heart.

#### Day 6 - Fiabacet - Misool

The diving in this part of Misool is filled with the pristine coral life in the heart of Misool and Giant Manta Rays, close to the Eco Resort. Whale rock, Tank Rock and Nudi Rock are both abundant in beautiful soft coral and schools of fish, and conditions and logistics with Misool Eco Resort will decide which of the sites are dived. The afternoon dive is at the dive site Boo West. Unique in topography, the reef is not to be missed, with excellent sea fan growth and stunning sloping reefs to explore while you anticipate the arrival of Oceanic Manta Rays. Yilliet Kecil is the night dive around here that is not to be missed, with excellent sea fan growth and stunning bommies to explore. There are also hidden beaches in this area if you fancy an evening beachwalk all by yourself.

### **Day 7 - Warakaraket - Misool**

Eagle's Nest is a large, unusual pinnacle which is often visited by Manta Rays as well as schooling Barracuda. Shadow Reef (a.k.a. Karang Bayangan/Magic Mountain) is undoubtedly the blockbuster dive site in this remote corner of Raja Ampat, located in the unprotected southern waters of Misool, but you can often find huge Manta Rays gliding across this incredibly 'hard to beat' dive site. The afternoon dive is at the iconic dive site Boo Window. Unique in topography, the reef has window-like swim-throughs, and a great chance for some wide-angle photos. Secret: the sea fans here often conceal Pygmy Seahorses! Romeo is the night dive around here where you will have a chance to meet the much-talked-about endemic species, the Raja Ampat walking shark!

### **Day 8 - North Fiabacet - Misool**

On the penultimate day of the trip, we start the day by diving Anchovy, a submerged reef surrounded by a host of towering pinnacles. Anchovy is often a colourful experience as it is home to many varieties of reef fish and it is also a prowling ground for schools of Devil Rays, which come here to feed. You might be in for a devilish feeding frenzy! Our journey to Sorong may take around 18 hours depending on currents and prevailing weather conditions. But after an incredible trip, our crew will make sure you're comfortable while they prepare a night of food, song and dance to party the night away with you while we set sail for Sorong.

### **Day 9 - Disembark in Sorong**

La Galigo will be anchored in the morning around 05:00am in Sorong, in preparation for you to catch your flight, or check-in to your hotel. Guests are welcome to stay onboard until 11:00am, and our staff will assist you with transportation to your desired location. After breakfast, guests may also take the time to exchange photos and swap contact details to keep in touch with new friends and dive buddies!

\*La Galigo does not guarantee this outlined itinerary, and it is to be considered as a rough guideline. Information compiled here is based on past trips we have conducted, and includes common dive sites and routes we often visit. Weather and sea conditions in the area can be unpredictable, and La Galigo retains the right to alter an itinerary from advice of the ship's captain, cruise director, or owner for the safety of the vessel, its passenger and crew.
